

**Comments from
2016 participants:**

“The workshops facilitated by experts were a fantastic learning experience. I particularly appreciated the opportunity to workshop a current ongoing trial.”

“If you are working on or wanting to design a RCT you need to go to this workshop. It teaches the *essentials* of designing and conducting trials.”

“Feel so inspired to improve trials I’m already involved in and to develop my own trials in future.”

“This Clinical Trials Management course has changed my life. “

NHMRC CRE Stroke Rehabilitation and
Brain Recovery

Training the next generation of researchers

Who should attend?

- ◆ Clinicians or scientists with a great idea and a desire to run a clinical trial
- ◆ Anyone thinking of embarking on a single site or multicentre clinical trial, but not quite sure where to start
- ◆ Current trialists seeking expert tips, tricks and advice to optimise trial progress

Course outline:

This introductory 2 day course will consist of information sessions and interactive small group workshops aimed at guiding you through the initial stages of planning, developing, running and finishing your clinical trial. Participants will have the opportunity to learn from experienced trialists and academic researchers to gain insights into the successful management and conduct of single site and multicentre clinical trials.

Using lecture and workshop formats we will cover the planning and start up of your trial, active trial management during the recruitment phase, data analysis and closedown phase.

Cost:

\$600.00 (includes GST)

What will be covered?

- ◆ Asking the right trial question and getting the right statistical advice early
- ◆ Planning your project - tips and tricks to make your project a success.
- ◆ Data collection practicalities, form design and management systems
- ◆ Building a strong supportive trial team
- ◆ Keeping sites motivated
- ◆ Intervention fidelity and monitoring
- ◆ Good Clinical Practice
- ◆ Planning for closeout/data closure/analysis
- ◆ Liaison with industry
